To whom it may concern,

We had received a number of complaints from tenants throughout our sixteen story building regarding the smell that was coming from the trash chute. While searching for a solution to our problem with the garbage smell, we came across the Boss Hydroxyl Generator and installed it in the trash room of our building. Since then, our trash room has been almost completely odorless. The machine was installed several months ago and since its installation we have had no further complaints about the smell. We have also noticed a reduction in complaints about pests like mice, who are typically drawn to smells. The Boss Hydroxyl Generator works wonderfully and we are very happy with our choice.

A handwritten signature in black ink, appearing to read 'Ari Ellis', with a stylized, cursive script.
